

Transportation Improvement Program

2021-2022-2023-2024

Prepared by

Bangor Area Comprehensive Transportation System Policy Committee

Approved by the BACTS Policy Committee on March 16th, 2021

Program of Projects (POP) Public Notice

Public notice of public involvement activities and time established for public review and comment on the Transportation Improvement Program (TIP) will satisfy the POP requirements of the Federal Transit Administration (FTA) Section (§) 5307 Program.

"The preparation of this document has been funded in part by the U.S. Department of Transportation, Federal Highway Administration, and Federal Transit Administration. The contents of this document do not necessarily state or reflect the official views or policies of the U.S. Department of Transportation."

Non-Discrimination Policy Statement

The Bangor Area Comprehensive Transportation System (BACTS), as a recipient of Federal financial assistance and under Title VI of the Civil Rights Act of 1964 and related statutes and regulations, is committed to ensuring that no person shall, on the grounds of race, color, national origin, gender, age, disability, income, or limited English proficiency, be excluded from participation in, be denied the benefit of, or otherwise be subjected to discrimination under any program or activity conducted by BACTS, regardless of whether programs and activities are federally funded or not.

Metropolitan Planning Organization (MPO) Certification Statement

The Maine Department of Transportation has conducted statewide evaluations to determine if there are reasonable alternatives to roads, highways, and bridges that have required repair and reconstruction activities on two or more occasions due to emergency events per the requirements of 23 CFR § 667. As a result of this evaluation, it can be certified that there are no locations meeting these parameters within the metropolitan planning boundaries. No further action is required at this time but if this statute is triggered in the future, all appropriate steps will be taken to develop reasonable alternatives to address the problem areas.

Introduction

This Transportation Improvement Program (TIP) is a federally mandated, annually prepared document that contains transportation projects recommended for federal funding during the next four years. This document describes both the transportation-related projects and the methodologies employed to determine the projects to be accomplished within the BACTS Metropolitan Planning Area (MPA) using Federal Highway Administration (FHWA), Federal Transit Administration (FTA), Maine Department of Transportation (Maine DOT), and local matching funds during the years of 2021, 2022, 2023, and 2024 in accordance with the requirements of 23 CFR Parts 450 and 49 CFR Part 613.

The projects included in the TIP ultimately establish an overall program strategy reflecting the BACTS Metropolitan Transportation Plan (MTP) and the State of Maine transportation plans, which are aimed at meeting the long-range needs of the transportation system. Where the MTP defines goals and objectives for transportation planning operations for the next twenty years; the TIP defines the actual expenditures and efforts to move towards or meet those goals and objectives.

Implementing agencies propose projects to BACTS on a biennial basis to be coordinated into a comprehensive listing of the area's federally funded transportation improvements planned for the short-range. These listings include information regarding cost, specific funding sources, project timing, etc. Once in the TIP, projects represent a commitment of funding on the part of the implementing agency. Included within this document is a description of the process that culminated in the establishment of the project slate listed, explanation of terms used, project rating criteria, public involvement in the process, compliance with other federal and state regulations, and certifications to funding agencies.

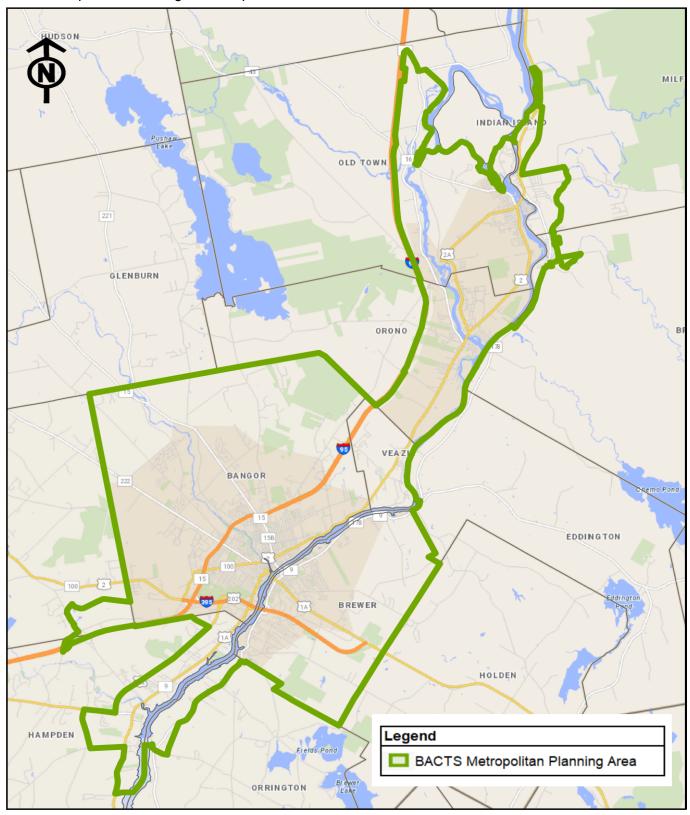

The 1980 U.S. Census determined that the Bangor Urbanized Area (UZA) defined by the Bureau of Census exceeded the threshold requirement of 50,000 population for the establishment of a planning agency to manage federal funding for transportation. In 1982, the Governor of the State of Maine, in accordance with the municipalities of Bangor, Brewer, Hampden, Old Town, Orono, and Veazie (the constituents of the Census UZA), created the Bangor Area Comprehensive Transportation Study (changed to "System" in 1996), the so-called BACTS Metropolitan Planning Organization (MPO). The Memorandum of Understanding between the municipalities and the State of Maine established the BACTS Policy Committee and its duties and jurisdictions.

The Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) provided the basis at the federal level for transportation planning; creating a multitude of new requirements for MPOs and the State, related to transportation planning. One of the ISTEA creations was expansion of transportation planning areas. The Census Defined UZA of BACTS incorporates those contiguous areas where population density exceeds 1,000 persons per square mile. ISTEA expanded that boundary to include additional areas that are urbanized, but do not meet the Census criteria. That area is termed the "urbanized area." ISTEA then defined another boundary to include those areas that probably will be classified as urbanized 20 years from now. That area is termed the "metropolitan planning area."

A map of the BACTS metropolitan planning area is located on page 2. The metropolitan planning area includes all of Bangor, Brewer, and Veazie and portions of Hampden, Old Town, Orono, Milford, Bradley, Hermon, Orrington, and Penobscot Indian Island. No federal funds may be encumbered on transportation activities within the BACTS planning area unless the BACTS TIP lists those expenditures. Within the BACTS area, the BACTS Policy Committee and MaineDOT have agreed to make MaineDOT responsible for certain areas of planning requiring overall knowledge of statewide planning activities.

Those areas of planning designated as MaineDOT domains include Interstate-95 (I-95) and Interstate-395 (I-395) activities, hazard elimination activities, major bridge planning activities, rail planning activities, airport planning activities, port and marine planning activities, and special transportation planning activities. While BACTS is not the lead agency, BACTS does coordinate with MaineDOT on these efforts.

BACTS Metropolitan Planning Area Map

Metropolitan Planning Area

Road Improvement Project Selection

To meet the requirements of Fixing America's Surface Transportation (FAST) ACT, the federal legislation enacted in 2015, and MaineDOT, there are several categories of projects listed in this TIP document. All projects in this TIP are consistent with the BACTS MTP. All transportation related projects on which federal funding will be expended during 2021-2024 must be listed in this document. This includes those projects over which MaineDOT has a domain. All I-95, I-395, bridge, rail, airport, marine, and hazard elimination projects within the BACTS metropolitan planning area are listed in this document. BACTS is not responsible for any prioritization process for these projects since they are ranked on a statewide basis. All other highway related projects are ranked by the BACTS criteria and ranked for inclusion in this document. The BACTS project rating process is detailed in Appendix A of this document.

Carryover projects are listed in this TIP. These are projects that were approved under previous programs that have been started either in the preliminary engineering phase or preconstruction phase but have not yet been constructed. Funding for these projects may be from previous programs, this program, or future programs, depending on the magnitude and complexity of the project.

Prioritized Project Listing

Applying the BACTS project rating criteria to the preliminary list of projects generated by the municipalities historically has produced a priority list of projects. This rating criteria can be found in Appendix A.

BACTS Prioritized Project List 2021-2023

Project ID	Municipality	Location	Category	Project Length in Miles (Est)	Preliminary Cost Estimate
*REH 2	Bangor	State Street -Hancock to Hogan Road	Rehab	.97	\$1,058,730.00
*REH 1	Orono	Main Street/Route 2 @ 428	Rehab	N/A	\$1,103,400.00
*PRES 18	Bangor	Hogan - Mt Hope to Haskell	Preservation	.42	\$582,705.00
*PRES 10	Bangor	Main Street, Dutton to TL	Preservation	.65	\$831,588.00
PRES 20	Hampden	Western Avenue -Main Rd North to Mayo Road	Preservation	.78	\$737,689.00
PRES 19	Hampden	Western Avenue - MRN to Route 202	Preservation	.41	\$546,736.00
PRES 3	Orono	Kelley Road - I95 to Old Kelley Road	Preservation	.68	\$418,600.00
OSI 1	Bangor	Kenduskeag and Griffin	OSI	N/A	\$271,600.00
OSI 2	Bangor	Hogan Road and Bangor Mall Blvd	OSI	N/A	\$80,400.00
OSI 7	Bangor	Broadway/I-95 SB on Ramp	OSI	N/A	\$670,000.00

^{*}Project was funded

FHWA Roadway Project Funding

A requirement of the FAST ACT legislation is that a financial plan be included with the TIP document indicating that funding is reasonably expected to be available in sufficient amounts to accomplish the projects listed each year.

The BACTS 2021-2024 TIP contains both MPO sponsored projects and those sponsored by MaineDOT. The BACTS sponsored projects are funded using federal, state, and local monies. The projects sponsored by MaineDOT and their funding information are found in the Maine DOT Statewide TIP (STIP). FHWA funds are allocated to BACTS by MaineDOT by formula. BACTS receives Surface Transportation Program (STP), Surface Transportation Block Grant Program (STBG), and National Highway Performance Program (NHPP), and National Highway System (NHS) funds as part of their allocation.

The type of funds is indicated as part of each project in the TIP list of projects. The non-federal funds used to match the allocated FHWA funds for highway projects are allocated at ten percent state and ten percent local funds.

All the funds for the 2021-2024 TIP are reasonably expected to be available based on both past funding and agreements with MaineDOT for the federal and state funds and the local communities for their share of projects.

Once the MPO sponsored project budgets and scopes are approved by BACTS Policy Committee, MaineDOT develops a three-party agreement for each project. The agreements are between MaineDOT, BACTS, and the municipality. These agreements detail the planned scope of work and the funding commitments. These agreements outline responsibilities through Right of Way (ROW) and preliminary engineering phases of work. This is to reduce the chance of future decision makers at each entity from significantly changing the decisions made by their predecessors. When the project is designed and ready for bid the MaineDOT develops a two-party agreement with the municipality to outline responsibilities during the construction and construction engineering phases of the project and locks in the financial commitments for the local share.

MaineDOT has provided BACTS with an estimated annual allocation of federal formula funding of \$1,976,120, MaineDOT funding of \$247,015 and required match of \$247,015 in local funds for BACTS sponsored projects.

Annual FHWA - MPO Sponsored Project Listing

As noted earlier, the estimated annual allocation of federal formula funding is \$1,976,120, Maine DOT funding is \$247,015 and required match is \$247,015 in local funds for BACTS sponsored projects. However, the allocation of federal funding available for obligation is reduced by \$552,000 annually through 2023, and state funding by \$69,000, per an agreement with MaineDOT to reimburse advanced funding provided for the Hampden Route 1A project (WIN 011577.00) as programed in the 2018 TIP/STIP. As a result, the total available funding for years 2021-2023 of this TIP for BACTS MPO-Sponsored projects is \$1,780,150. For year 2024 the available funding is \$1,976.120. Below is a list of prioritized projects, construction phase and the allocation year they were funded.

WIN#	Project Title	Project type	Allocation Year
023521.00	Bangor, State Street, Construction	Rehabilitation	2021
022445.00	Old Town, Stillwater Avenue, Construction	Preservation	2021
023112.00	Brewer Route 9 Penobscot Corridor PE and	Signal /OSI	2021
	Construction		
023114.00	Bangor Route 2, Penobscot Corridor, PE and ROW only	Signal/OSI	2021

	Miscellaneous unallocated construction projects		2024

Annual FTA § 5307 Transit Operations and Maintenance Project Listing

FTA's Urbanized Area Formula Funding program (§5307) makes federal resources available to urbanized areas for transit capital and operating assistance and transportation related planning in urbanized areas. Eligible activities include planning, engineering, design and evaluation of transit projects and other technical transportation-related studies; capital investments in bus and bus-related activities such as replacement, overhaul and rebuilding of buses; crime prevention and security equipment; construction of maintenance and passenger facilities; overhaul and rebuilding of vehicles, communications, and computer hardware and software.

All preventive maintenance and some Americans with Disabilities Act (ADA) complementary paratransit service costs are considered capital costs. Because the greater Bangor urbanized area has a population of less than 200,000; operating assistance is also an eligible expense under the §5307 program.

Below is the Program of Projects (POP) proposed by the City of Bangor – Community Connector to be funded from FTA §5307 formula funding.

2020 FTA §5307 Funding Apportionment Carried Forward to 2021 - Unprogrammed

2024 FTA §5307 Projects

WIN	Project Description		Federal			Federal		Federal		Federal		Federal State		ate Local		Total
025593.00	Urban Transit ADA Paratransit Service Operating Assistance		\$	170,000			\$	42,500	\$ 212,500							
025589.00	Capital – Eligible Preventative Maintenance		\$	549,656			\$	137,414	\$ 687,070							
025591.00	Urban Transit System Operating Assistance		\$	810,789	\$	101,109	\$	709,680	\$ 1,621,578							
		Total	\$	1,530,445	\$	101,109	\$	889,594	\$ 2,521,148							

In April 2020, FTA allocated Coronavirus Aid Relief and Economic Security (CARES) Act funding to transit agencies under the § 5307 program. These funds are available in addition to appropriated formula funds and

are made available to support capital, operating, and other expenses generally eligible under the § 5307 program up to 100-percent federal share.

The City of Bangor - Community Connector has programmed allocated CARES Act funding for fiscal year 2021 operating expenses at 50-percent share, as well as the capital purchase of ADA Paratransit vehicles and bus support equipment at 100 percent federal share.

Annual FTA § 5339 Transit Capital Project Listing

FTA's Bus and Bus Facilities program (§5339) makes federal resources available to States and designated recipients to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities including technological changes or innovations to modify low or no emission vehicles or facilities. Funding is provided through formula allocations and competitive grants.

As the small urban transit provider in the greater Bangor urbanized area, the City of Bangor - Community Connector receives FTA § 5339a Bus and Bus Facilities formula funds annually as allocated by the MaineDOT Multimodal Planning Division. This funding is provided to assist in financing capital projects to replace, rehabilitate, purchase buses and related equipment, and to construct bus-related facilities.

FTA §5339a Formula Funding Allocation Carried Forward to 2021

WIN	Project Description		Federal	State	ate Local		Total
022769.19	Transit Capital Assistance for Small Urban Transit - Bus Support Equipment		\$ 116,820		\$	29,205	\$ 146,025
022769.20	Transit Capital Assistance for Small Urban Transit - Bus Support Equipment		\$ 121,585		\$	30,396	\$ 151,981
		Total	\$ 238,405		\$	59,601	\$ 298,006

2021 - 2024 FTA §5339a Formula Funding - Allocated by MaineDOT but not Programmed

WIN	Project Description	Federal	State	Local	Total
022769.21	Transit Capital Assistance for Small Urban Transit - FY 2021	\$ 116,820		\$ 29,205	\$ 146,025
022769.22	Transit Capital Assistance for Small Urban Transit - FY 2022	\$ 116,820		\$ 29,205	\$ 146,025
024739.00	Transit Capital Assistance for Small Urban Transit - FY 2023	\$ 116,820		\$ 29,205	\$ 146,025
025553.00	Transit Capital Assistance for Small Urban Transit - FY 2024	\$ 127,530		\$ 22,505	\$ 150,035

In addition to the §5339a Bus and Bus Facilities formula funding allocated by MaineDOT, the §5339 funding program also offers an opportunity for transit agencies to competitively apply for funding for capital projects to replace, rehabilitate, purchase buses and related equipment, and to construct bus-related facilities.

In the 2020 program of projects, there were two §5339b projects programmed that have been carried forward to 2021. In fiscal year 2018, the City of Bangor - Community Connector was awarded funding to purchase an additional seven buses and obtain smart bus technology and bus support equipment. In fiscal year 2019, the City of Bangor - Community Connector was awarded funding to construct a new transit center and related technology, as well as bus stop and shelter facilities.

In August 2020, the City of Bangor - Community Connector was notified that they were also successful in being awarded a §5339b grant to add passenger shelters and bus boarding areas to the service area.

2020 FTA §5339b Projects - Carried Forward to 2021

WIN	Project Description	Federal	State	Local	Total
024329.00	FY18 §5339b Bus and Bus Facilities Grant - Purchase seven (7) 30-foot Transit Buses and Smart Bus Technology	\$ 2,890,000	\$ 519,000	\$ 11,000	\$ 3,420,000
024753.00	FY19 §5339b Bus and Bus Facilities Grant - Construct New Transit Center; Related Communication Systems and Amenities; Bus Stops and Shelters	\$ 1,286,000		\$ 321,500	\$ 1,607,500
	Total	\$ 4,176,000	\$ 519,000	\$ 332,500	\$ 5,027,500

2021 FTA §5339b Projects

WIN	Project Description	Federal	State		Local	Total
025351.00	FY20 §5339b Bus and Bus Facilities Grant - Bus Stops and Shelters Infrastructure	\$ 396,800		\$	99,200	\$ 496,000
	Total	\$ 396,800	\$	- \$	99,200	\$ 496,000

Transit Program Financial Plan

To determine amounts that can be expected for future year appropriated §5307 funding, a growth rate was estimated using the annual average increase for the previous five years (2017-2021) of authorizations of formula funds (3.73%). Amounts available to be programmed may also include carryover funds from the previous program year. The amount of §5307 carryover funds available for programming is \$878,264. The financial tables Appendix B show the total funding of transit projects programmed by federal source and year.

Federal Formula Funding Ap	propriation	s, Obligatio	ons	and Carryo	ver	s		
			Estimated Appropriations					
		2021		2022		2023		2024
Total §5307 Appropriated Funding	\$	1,418,950	\$	1,471,924	\$	1,526,876	\$	1,583,879
Obligated Funds During Fiscal Year			\$	1,490,821	\$	1,530,445	\$	1,530,445
§5307 Funds Carried Forward for Future	\$	2,297,214	\$	2,278,317	\$	2,274,748	\$	2,328,182
Total CARES Act Appropriated Funding								
Obligated Funds During Fiscal Year	\$	2,115,940						
CARES Act Funds Carried Forward for Future	\$	927,229						
Total §5339a Allocated Funding	\$	116,820	\$	116,820	\$	116,820	\$	127,530
Obligated Funds During Fiscal Year	\$	238,405						
§5339a Funds Carried Forward for Future	\$	116,820				·		

The local funds required for operating the federally funded fixed route transit system are allocated, by formula based on percentage of vehicle revenue hours, among the six municipalities which the Community Connector serves and the University of Maine. The funds required for operating the locally funded Black Bear Orono Express are paid equally by the Town of Orono and the University of Maine.

Financial Capacity of Public Transit Operator

The City of Bangor owns and operates the fixed route public transit system in the BACTS area and is a direct recipient of FTA § 5307 Urbanized Area Formula Funding. FTA requires grantees to certify their ability to;

- a. operate and maintain current assets
- b. operate and maintain new projects listed in the TIP/STIP, and
- c. maintain the same level of service during a 20-year period, or a single equipment replacement cycle.

These self-certifications are subjected to FTA review during STIP approval and, subsequently, at the time of grant application. BACTS relies on FTA's *Financial Capacity Certifications* to fulfil the requirement for demonstrating the transit operator's ability to operate and maintain their systems.

Annual Planning Funding and Programming

MPOs receive federal funds, established by formula, to support planning studies and report preparation for the transportation planning process, through FHWA's Metropolitan Planning Funds (PL), and through FTA's § 5303 program. These planning program funds make up the majority of BACTS budget for carrying out planning activities and studies, and for developing transportation plans, TIPs, and other planning documents. Planning is also an eligible activity under various capital programs, such as STBG, Congestion Mitigation and Air Quality Improvement Program (CMAQ), and FTA's urban and non-urban area formula programs. The PL and § 5303 planning programs are jointly administered by FHWA and FTA.

FHWA PL funding allocated to BACTS by MaineDOT has remained flat since 2014. BACTS was notified that PL funding through 2021 was anticipated to remain at the same levels. The local match required for FHWA PL funding is paid by member municipalities and assessed by formula on an annual basis.

FTA § 5303 funding allocated to BACTS by MaineDOT has increased by an average of 2.97 percent over the last five years (2016-2020). Local match for FTA § 5303 funding is made by member municipalities through in-kind contributions.

2021 - 2024 FTA §5303 Metropolitan Planning Funding to Support UPWP

WIN	Project Description	Federal		State	Local		Total	
023342.21	BACTS Metropolitan Planning 2021	\$	81,000		\$	20,250	\$	101,250
023342.22	BACTS Metropolitan Planning 2022	\$	81,000		\$	20,250	\$	101,250
024695.00	BACTS Metropolitan Planning 2023	\$	82,000		\$	20,500	\$	102,500
025607.00	BACTS Metropolitan Planning 2024	\$	82,000		\$	20,500	\$	102,500

Public Participation Process

The BACTS Policy Committee is the policy making body and has authority to develop, endorse, and revise the TIP when needed. Policy Committee meetings are open to the public. Meeting notices and agendas are posted to the BACTS website seven days prior to a scheduled meeting and meeting minutes are available after Committee approval.

The BACTS Policy Committee has a written Public Participation Plan, which is available on the BACTS website. A notice of opportunity for public comment along with the draft TIP document shall be posted on the BACTS website. A public notice of the posting and public comment period shall be sent (either via e-mail or postal mail) to the contacts on the *Interested and Affected Parties* mailing list. A period of at least 30 days beginning from the date of the posting of public notice shall be provided during which comments may be submitted to BACTS for consideration.

BACTS compiles all relevant public comments (for MPO-Sponsored projects), or a summary of similar comments, for consideration by the Policy Committee prior to final approval of the TIP. Comments received and Policy Committee responses are included as part of the final TIP. Any public comments received on MaineDOT-Sponsored projects will be forwarded to MaineDOT for their review, response and inclusion in the final STIP. The final approved TIP shall be posted on the BACTS website and shall be available at the BACTS office for public viewing.

To receive a grant under FTA §5307, a recipient must meet certain requirements concerning public participation in development of a POP and must certify compliance with these requirements. As a recipient of FTA §5307 funding, the City of Bangor has opted to satisfy their public participation requirements through the development of the metropolitan TIP. *Public notice of public involvement activities and time established for public review and comment on the TIP will satisfy the POP requirements of the § 5307 Program.*

Air Quality Conformity

The BACTS UZA has been determined to be in attainment for all federal air quality standards at this time.

Performance Based Planning and Programming Requirements and Performance Measures

To accomplish the goals and objectives of a continuing, cooperative, and comprehensive performance-based multi-modal transportation planning process, BACTS, in cooperation with the MaineDOT and the City of Bangor - Community Connector, is required to develop a TIP through a performance-driven, outcome-based approach to planning for the metropolitan area.

Under the performance-based approach to transportation decision making, the metropolitan transportation planning process must include the establishment of performance targets that address the performance measures or standards established by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) to use in tracking progress toward attainment of critical outcomes for the region in support of the following seven national transportation goals.

- 1. Safety
- 2. Infrastructure Condition
- 3. Congestion Reduction
- 4. System Reliability
- 5. Freight Mobility and Economic Vitality
- 6. Environmental Sustainability
- 7. Reduced Project Delivery Delays

The TIP is designed such that once it is implemented, it makes progress toward achieving the performance targets established.

The Performance Based Planning and Programming rule requires that an MPO integrate (directly or by reference) the goals, objectives, performance measures, and targets described in state transportation plans and transportation processes, as well as any plans developed by providers of public transportation, required as part of a performance based-program. These plans include:

- 1. The State Asset Management Plan for the NHS (as defined in 23 U.S.C. 119(e))
- 2. Transit Asset Management Plan (49 U.S.C. 5326)
- 3. Applicable portions of the HSIP, including the SHSP (23 U.S.C. 148)
- 4. The Public Transportation Agency Safety Plan (49 U.S.C. 5329(d))
- 5. Other safety and security planning and review processes, plans, and programs, as appropriate
- 6. The Congestion Mitigation and Air Quality Improvement Program performance plan, as applicable (23 U.S.C. 149(I))
- 7. Appropriate (metropolitan) portions of the State Freight Plan (MAP-21 § 1118)
- 8. The congestion management process, if applicable (23 CFR 450.322)
- 9. Other State transportation plans and transportation processes required as part of a performance-based program.

FHWA Safety Performance Measures

The Moving Ahead for Progress in the 21st Century Act (MAP-21, P.L. 112-141) and subsequent federal rulemaking established five performance measures related to Safety. The measures are:

- 1. Number of fatalities;
- 2. Number of serious injuries;
- 3. Rate of fatalities per 100 million vehicle miles traveled;
- 4. Rate of serious injuries per 100 million vehicle miles traveled; and
- 5. Number of non-motorized fatalities and serious injuries.

Federal regulations require BACTS to establish safety targets (expressed as five-year rolling averages and compared with a five-year rolling average base period comprising of the five calendar years ending prior to the year the targets are due) each year by either:

- 1. Agreeing to plan and program projects so that they contribute toward the accomplishment of the State DOT safety target for that performance measure; **OR**
- 2. Committing to a quantifiable target for that performance measure for their metropolitan planning area.

The BACTS Policy Committee has committed to support the performance targets for all five safety performance measures developed by MaineDOT and plan and program projects so that they contribute toward the accomplishment of these targets as shown below.

MAINE STATEWIDE PM-1 SAFETY PERFORMANCE TARGETS									
2021 2020 2019 2018									
Number of Fatalities	158.0	161.0	165.0	153.4					
Number of Serious Injuries	725.0	737.0	737.6	736					
Rate of Fatalities	1.12	1.07	1.1	1.03					
Rate of Serious Injuries	5.02	4.90	4.90	5.12					
Number of Non-Motorized Fatalities and Serious Injuries	89.0	90.0	91.0	90.0					

Source: MaineDOT Office of Safety

The MaineDOT Office of Safety has developed BACTS metropolitan planning area specific calculations applying the same assumptions and methodology used to develop the Statewide performance targets as shown below.

BACTS PLANNING AREA PM-1 SAFETY PERFORMANCE TARGETS									
<u>2021 2020 2019 2018</u>									
Number of Fatalities	6.0	5.6	6.0	7.4					
Number of Serious Injuries	36.0	38.0	39.0	43.6					
Rate of Fatalities	0.66	0.66	0.71	0.87					
Rate of Serious Injuries	4.23	4.50	4.64	5.08					
Number of Non-Motorized Fatalities and Serious Injuries	9.0	9.0	9.8	11.4					

Source: MaineDOT Office of Safety

In supporting the MaineDOT developed safety performance targets, BACTS will continue to work with the State and safety stakeholders to address areas of concern for fatalities and serious injuries within the metropolitan planning area. Theses local, regional and state-wide efforts are aimed at decreasing crashes and serious injuries through better crash investigation and reporting that can reveal existing hazardous areas, stricter enforcement of existing laws and regulations, physical reconfigurations of hazardous conditions, more local regulations that encourage good bicycling and walking environments, and greater awareness of other users of the transportation system.

Many stakeholders across the State are working together to improve these results and the 2017 MaineDOT Strategic Highway Safety Plan outlines action plans related to Enforcement, Education, Engineering and Emergency/Incident Response that are necessary to affect safety improvements. The Plan defines the crash focus areas and outlines the strategies that the various stakeholders can employ together in a coordinated, comprehensive program. BACTS supports the State's efforts and coordinates and cooperates with MaineDOT to the maximum extent possible in implementation of programs, plans and projects which improve the safety of the transportation network of the region, and the State.

This TIP incorporates the goals and objectives of the Maine Highway Safety Improvement Program and the Maine Strategic Highway Safety Plan.

FHWA PAVEMENT AND BRIDGE PERFORMANCE MEASURES

The Moving Ahead for Progress in the 21st Century Act (MAP-21, P.L. 112-141) and subsequent federal rulemaking established six performance measures related to Bridge and Pavement Condition. The measures are:

- 1. Percentage of Interstate pavements in Good condition
- 2. Percentage of Interstate pavements in Poor condition
- 3. Percentage of non-Interstate NHS pavements in Good condition
- 4. Percentage of non-Interstate NHS pavements in Poor condition
- 5. Percentage of NHS bridges by deck area in Good condition
- 6. Percentage of NHS bridges by deck area in Poor condition

Federal regulations required BACTS to establish initial bridge and pavement condition performance targets on or before November 16, 2018, and requires targets to be established every four years thereafter, related to each of these six performance measures by either:

- 1. Agreeing to plan and program projects so that they contribute toward the accomplishment of the State DOT target for that performance measure; or
- 2. Committing to a quantifiable target for that performance measure for the metropolitan planning area.

MaineDOT owns the entire NHS system in Maine except for the Maine Turnpike. MaineDOT collects 100% of the pavement data for the NHS system (including the Turnpike) and inspects all non-Turnpike bridges. Maine NHS pavement data is collected annually by a single collection vehicle and a single MaineDOT crew; therefore, maximizing the potential for consistent data collection. MaineDOT inspects NHS bridges on a 24-month cycle using both above and underwater inspection teams.

As MaineDOT has responsibility and authority for planning and programming all projects for the Interstate and major bridge planning activities, the BACTS Policy Committee has agreed to support the relevant MaineDOT established 4-year pavement and bridge condition performance targets and support the planning and programming of projects that contribute to MaineDOT's performance targets as shown below.

Asset		Existing Conditions	2-Year Target	4-Year Target	SOGR
Interstate Pavement					
	Good	36.3%	38.0%	40.0%	40.09
	Fair	62.5%			57.09
	Poor	1.2%	1.5%	1.5%	3.09
Non-Interstate Pavement					
	Good	31.2%	32.0%	34.0%	35.09
	Fair	63.3%			55.09
	Poor	5.5%	5.0%	5.0%	10.09
NHS Bridges	Good	30.0%	32.0%	34.0%	40.09
·	Fair	66.3%			53.09
	Poor	3.8%	4.0%	4.0%	7.09

The MaineDOT Results and Information Office has provided BACTS with region specific pavement and bridge condition data as shown below.

BACTS Region NH	S Pavement	Existing Condi	tions
Asset	Condition	Lanes Miles	Percent Lane Miles
Interstate Pavement	Good	22.27	36.0%
	Fair	39.36	63.7%
	Poor	0.2	0.3%
	Total	61.83	
Non-Interstate Pavement	Good	11.48	17.4%
	Fair	46.08	69.8%
	Poor	8.47	12.8%
	Total	66.03	
BACTS Region N	IHS Bridge Ex	isting Condition	ons
Asset	Condition	Deck Area	Percent Deck Area
NHS Bridge	Good	58,101	10.9%
	Poor	31,847	6.0%
	Total	534,955	

Minimum acceptable pavement conditions require that not more than five percent of Interstate pavements be in poor condition. FHWA will make yearly determinations of minimum pavement conditions and if it is determined that the Interstate pavement condition falls below the minimum level for any given year, MaineDOT will be required to obligate the NHPP and transfer a portion of its STP funds to adequately address pavement conditions.

Minimum acceptable conditions for NHS bridges that require that not more than ten percent of the total deck area of a State's NHS bridges are classified as structurally deficient for three consecutive years. FHWA will make a yearly determination for the minimum bridge condition and if that minimum is not met for three consecutive years, MaineDOT will be required to obligate NHPP funds and reserve funds for eligible bridge projects.

This TIP incorporates the goals and objectives of the Maine DOT Transportation Asset Management Plan for the NHS.

MaineDOT Transportation Asset Management Plan:

https://www.maine.gov/mdot/publications/docs/plansreports/MaineDOT-Transportation-Asset-Management-Plan-final.pdf

FHWA System Performance and Freight Performance Measures

The Moving Ahead for Progress in the 21st Century Act (MAP-21, P.L. 112-141) and subsequent federal rulemaking established six performance measures to carry out the NHPP; the National Highway Freight Program (NHFP); and the CMAQ. The measures are:

- 1. Two measures to assess reliability of system performance:
 - a. Percent of reliable person-miles traveled on the Interstate.
 - b. Percent of reliable person-miles traveled on the non-Interstate NHS.
- 2. A measure that will assess freight movement on the Interstate by the percentage of Interstate system mileage providing for reliable truck travel time (Truck Travel Time Reliability Index).
- 3. A measure that will assess total emissions reductions by applicable pollutants under the CMAQ program.
- 4. Two measures that will assess traffic congestion under the CMAQ program:
 - a. A measure that will assess annual hours of peak hour excessive delay per capita.
 - b. A measure that will assess modal share; specifically, the percent of non-single occupancy vehicle travel which includes travel avoided by telecommuting.

The BACTS area does not contain any part of a nonattainment or maintenance area for any of the criteria pollutants, as provided in 23 CFR 490.105(f)(6); and is therefore not subject to the CMAQ traffic congestion measure (23 CFR 490.703), or on-road mobile source emissions measures (23 CFR 490.707 and 23 CFR 490.807) as identified in the measures described in 3 and 4 above.

Federal regulations required BACTS to establish initial System Performance and Freight reliability performance targets on or before November 16th, 2018, and every four years thereafter, related to each of these performance measures by either:

- 1. Agreeing to plan and program projects so that they contribute toward the accomplishment of the State DOT targets for system performance and freight reliability performance measure; or
- 2. Committing to a quantifiable target for that performance measure for their metropolitan planning area.

The BACTS Policy Committee agreed to support the MaineDOT developed performance targets and plan and program projects to contribute toward the accomplishment of the relevant MaineDOT established 4-year System Performance and Freight Reliability performance targets as shown below. The MaineDOT Results and Information Office also provided BACTS with region specific system performance and freight reliability condition data as shown below.

Maine PM3 System Performance and Freight Reliability on NHS											
Performance Measure		2017 Data	2018 Performance	MaineDOT Target							
Truck Travel Time Reliability Index (TTTR)	Statewide	1.23	1.24	< 1.50							
	BACTS	1.26	1.29								
% PMT Reliable on Interstate	Statewide	100.00%	100.00%	>= 95%							
	BACTS	100.00%	100.00%								
% PMT Reliable on Non-Interstate NHS	Statewide	91.30%	91.50%	>= 90%							
	BACTS	92.00%	85.50%								

BACTS will track and monitor non-interstate NHS performance to determine if decline in performance is related to any specific area, related to weather events, construction events or other non-traffic related issues. BACTS will continue to support local, regional and state-wide efforts to improve system performance and reliability.

This TIP incorporates the goals and objectives of the Maine Integrated Freight Strategy.

Maine Integrated Freight Strategy:

https://www.maine.gov/mdot/ofbs/docs/MaineDOT-FreightStrategy-Updt20171114.pdf

FTA Transit Asset Management Performance Measures

The Moving Ahead for Progress in the 21st Century Act and subsequent federal rulemaking established four state of good repair performance measures under the transit asset management (TAM) rule for a strategic and systematic process of operating, maintaining, and improving public capital assets effectively through their entire life cycle.

The purpose of TAM is to help achieve and maintain a state of good repair (SGR) for the nation's public transportation assets. The TAM rule develops a framework to monitor and manage public transportation assets, improve safety, increase reliability and performance, and establish performance measures.

The performance measures are:

- 1. **Rolling Stock** The percentage of revenue vehicles (by type) that exceed the useful life benchmark (ULB).
- 2. Equipment The percentage of non-revenue service vehicles (by type) that exceed the ULB.
- 3. **Facilities** The percentage of facilities (by group) that are rated less than 3.0 on the Transit Economic Requirements Model (TERM) Scale.
- 4. **Infrastructure** The percentage of track segments (by mode) that have performance restrictions. Track segments are measured to the nearest 0.01 of a mile.

Although public transit agencies are required to set and report transit state of good repair targets annually, MPOs are not required to set planning area targets annually. MPOs may choose to set targets more often, however, state of good repair targets are required to be revisited and updated when updating the MTP.

In January 2019, the BACTS Policy Committee adopted State of Good Repair performance targets from 2020 – 2023, when the next MTP will be updated.

In November 2019, the Policy Committee adjusted the rolling stock asset class useful life definitions and benchmarks to better align the BACTS Metropolitan Planning Area performance metrics with those being used by the City of Bangor - Community Connector. The definitions and benchmarks are shown in the table below and performance targets from 2020 on have been calculated using the adjusted ULB definitions and benchmarks. Because the last Cutaway bus will be retired and there are no plans to include that type of vehicle in the fleet, that asset class has been removed from the definitions.

	BACTS METROPOLITAN PLANNING AREA TRANSIT ASSET CATEGORY: ROLLING STOCK DEFINITIONS AND BENCHMARKS										
	Subcategory Class Definition (Years)										
BU	Bus	S	Standard	Rubber-tired passenger vehicles 29 feet or greater in length, powered by diesel fuel engine.	12	From date of manufacture					
		E	Extended Life	Rubber-tired passenger vehicles 29 feet or greater in length, powered by diesel fuel engine, with significant and purposeful investments made to rebuild mechanical systems with the intent of enhancing reliability and extending the vehicle's life.	16	From date of manufacture					
MV	Minivan			Light-duty vehicle having a typical seating capacity of up to seven passengers plus a driver.	8	From date of manufacture					
RT	Rubber Tire Trolley			Rubber-tire bus designed to resemble an old-style Trolleybus	14	From date of manufacture					

Performance targets for rolling stock for fiscal years 2020 through 2023 are calculated based on the following assumptions:

- 7 new Standard Buses will be added to the fleet, and 4 will be retired in 2020
- 1 Cutaway Bus will be retired; and that class of asset will be eliminated from the fleet in 2020
- 3 new Minivans will be added to the fleet, and 1 will be retired in 2020
- 3 new Standard Buses will be added to the fleet, and 1 will be retired in 2021
- 2 Extended Life Buses will be retired in 2021
- 2 Standard Buses will be added to the fleet, and 1 will be retired in 2022
- 2 Extended Life Buses will be retired in 2022
- 2 Standard Buses will be added to the fleet, and 3 will be retired in 2023

	BACTS METROPOLITAN PLANNING AREA FY 2020 - 2023 PERFORMANCE TARGETS ASSET CATEGORY: ROLLING STOCK										
Roll	Rolling Stock Performance Targets - Assets that Meet or Exceed ULB										
		FY20 FY21		21	FY	22	FY23				
Sub-Category	Class	ULB*	# in Fleet	Target							
Bus (BU)	(S) Standard	12	17	11.76%	19	5.26%	20	0.00%	19	0.00%	
Bus (BU)	(E) Extended Life	16	6	66.67%	4	50.00%	2	0.00%	2	0.00%	
	BU Subcategory Total		23	26.09%	23	13.04%	22	0.00%	21	0.00%	
Trolley (RT)	Trolley (RT)		1	100.00%	1	100.00%	1	100.00%	1	100.00%	
Minivan (MV)		8	3	0.00%	3	0.00%	3	0.00%	3	0.00%	
	Total		27	25.93%	27	14.81%	26	3.85%	25	4.00%	

During the City of Bangor 2019 fiscal year (July 1st, 2018 to June 30th, 2019), renovations to the Pickering Square Parking Garage began. The Bus Hub waiting area was dislocated as well during the construction. Temporary waiting areas, shelters and restrooms were used during the construction. The construction was not completed during the fiscal year.

Performance targets for facilities for fiscal years 2020 through 2023 are calculated based on the following assumptions:

- Construction on the Pickering Square Parking Garage completed during calendar year 2020.
- Construction of the new Transit Facility will be completed in calendar year 2022.
- No other facility construction/renovation projects are planned.

	BACTS METROPOLITAN PLANNING AREA FY 2020-2023 PERFORMANCE TARGETS: ASSET CATEGORY: ADMINISTRATIVE AND MAINTENANCE FACILITIES										
			2020	Target	2021	Target	2022	Target	2023	Target	
Category	Sub-Category	Class	Condition Exceeding Benchmark		Condition	Exceeding Benchmark	Condition	Exceeding Benchmark	Condition	Exceeding Benchmark	
	Administrative Facility	Administrative Office City of Bangor Motor Pool Garage	5.00 2.00	50.00%	5.00 2.00	50.00%	5.00 2.00	50.00%	5.00 2.00	50.00%

F	Passenger Facility	Pickering Square Bus Hub	1	100.00%	1	100.00%	1	100.00%	5	0.00%
Facilities	Facilities Parking Facility Pickering Square Parking Garage		4	0.00%	4	0.00%	4	0.00%	4	0.00%
	Total Pas	senger and Parking Facilities	2.5	50.00%	2.5	50.00%	2.5	50.00%	4.5	0.00%

This TIP incorporates the City of Bangor - Community Connector's goals and objectives in the most recently modified Transit Asset Management Plan as of September 20, 2020.

City of Bangor - Community Connector TAM Plan: https://bactsmpo.org/wp-content/uploads/2021/01/2020-Community-Connector-TAM-PLAN-1.pdf

FTA Transit Safety Performance Measures

The National Transit Safety Plan (NSP) outlines four categories of safety measures, whereby seven safety performance targets must be established by mode:

- 1. Fatalities **Total number** of fatalities reported to NTD and **rate per total vehicle revenue miles (VRM)** by mode.
- 2. Injuries **Total number** of injuries reported to NTD and **rate per total VRM** by mode.
- 3. Safety Events Total number of safety events reported to NTD and rate per total VRM by mode.
- 4. System Reliability **Mean distance** between major mechanical failures by mode.

Transit agencies are required to review their Public Transportation Agency Safety Plans, and performance targets, annually. Just as with TAM SGR performance targets, MPOs are not required to set new transit safety targets each year, but can revisit the regional safety performance targets based on the schedule for preparation of its system performance report that is part of the MTP.

The initial BACTS metropolitan planning area transit safety performance targets were calculated using the peer benchmarking strategy using data obtained from the National Transit Database. The BACTS Policy Committee adopted the initial transit safety performance targets on January 19th, 2021.

	SAFETY PERFORMANCE TARGETS BENCHMARKING Fatalities Injuries Safety Events System Reliability										
	Fatalities Injuries Safety Events										
Mode	Total Number	Rate per 100,000 VRM	Total Number	Rate per 100,000 VRM	Total Number	Rate per 100,000 VRM	VRM/Major Mechanical Failures				
МВ	0	0.00	2.40	0.37	2.30	0.36	(641,002 / 42.65) 15,029.35				
DR	0	0.00	þ.20	0.35	0.20	0.35	(57,593 / 2.52) 22,854.50				

This TIP incorporates the City of Bangor Community Connector's goals and objectives in the most recently submitted Public Transportation Agency Safety Plan issued October 30, 2020.

City of Bangor - Community Connector Public Transportation Agency Safety Plan: https://bactsmpo.org/wp-content/uploads/2021/01/2020-City-of-Bangor-Community-Connector-PTASP-1.pdf

Project Listings

The following project lists, in Appendix C, detail all transportation projects within the BACTS Region recommended for federal funding from 2020 through 2023. These lists were generated by MaineDOT and represent a snapshot of that point in time. Since the printing of these lists, corrections, additions, and deletions to the original document have been made and documented on the Errata Sheet in Appendix D. The Errata Sheet is a running compilation of any changes, errors and omissions in the original listing and is incorporated into the approved TIP document. The Errata Sheet is also a dynamic document which will be updated throughout the lifecycle of this Program to document any approved changes to projects within this TIP.

Appendix A BACTS Project Rating, Screening, and Scoring

Project Rating

The BACTS Policy Committee initially adopted a project rating criterion in 1998. The criteria have been revised several times, most recently in 2009, to address minor issues that were not foreseen in the earlier versions.

Proposal Screening

All proposed projects shall be pre-screened by the BACTS Policy Committee and staff to ensure that they meet minimum area standards for submission, before they are formally evaluated according to the project criteria. All proposals must meet the following screening requirements:

- 1) Proposals for road improvements shall be for collector or arterial roadways.
- 2) Proposals shall have clear geographic scope limits, and a clear and reasonable scope of work as determined by the BACTS Policy Committee. In many cases, the cost per mile as evaluated by the Policy Committee will be different from the value assigned by MaineDOT staff during the preliminary scoping process, as it will be based on actual costs for similar local projects in previous TIPs and adjusted as necessary for inflation.
- 3) Proposals shall be consistent with the goals and objectives of the BACTS MTP and, wherever applicable, shall incorporate the recommendations of completed BACTS transportation studies.
- 4) Proposals shall not conflict with the comprehensive plan or other policy documents of the municipalities in which they are located.
- 5) Municipalities will coordinate with any necessary utilities located within the projects limits in order to coordinate utility work plans with possible projects. Proposals shall be scoped to include all necessary utilities work in the cost estimates.
- 6) Municipal officials will sign statements agreeing to the finalized scope for each project in their municipality, as determined by the Policy Committee, prior to the start of the scoring process.

Proposal Scoring

Proposals will be evaluated by the weighted scoring of variables appropriate for each of four types of project: Development (reconstruction), Rehabilitation, Preservation, and Operational and Safety Improvements. The BACTS Policy Committee will determine and assign a percentage of each biennial budget allocation to each of these four categories. Thus, all project comparisons will be made among projects within a single category, with the top-ranked projects in each category selected for funding in the current TIP. However, the Policy Committee shall have the flexibility to adjust and re-adjust the category allotments during the project selection process as necessary, in order to maximize the regional impact of the finalized TIP. The evaluation criteria for each project type are listed below. A detailed description of each factor is provided following the evaluation tables.

Any potential projects submitted in the upcoming TIP that had any surface treatment maintenance performed must be brought to the BACTS Policy Committee beforehand. BACTS staff then conducts a pavement rating for that project prior to the maintenance. This rating is then used as the pavement condition instead to prevent a project from being penalized for performing maintenance. The definition of surface treatment maintenance is any crack sealing or resurfacing one inch or less with spot grinding and fill acceptable. The allowance is good for the current TIP project submission.

Project Categories / Types

- 1.) Development The creation or substantial replacement of a highway, *sidewalk, bicycle lane, or other transportation asset. In MPO areas, this category covers primarily:
 - Reconstruction which calls for removing and replacing the pavement, gravel base and sub-base for
 more than half of the project length. Reconstruction primarily addresses structural deficiencies, grade
 problems, and safety concerns, often in order to bring a highway up to modern design standards.
 Reconstruction may involve substantial drainage work, the addition of travel lanes, and significant
 alignment changes. Typical design life is 20 years.

<u>Factors</u>	<u>Score</u>	<u>Weight</u>
Traffic volume	0 to 10	0.30
Truck percentage	0 to 10	0.10
Pavement condition	0 to 10	0.20
Road geometrics	0 to 10	0.25
Multi-modal and TDM	0 to 10	0.15
Access Management	0 to 10	0.15
Maximums	60	1.15

- 2.) Preservation Work designed to preserve the investment in a road that has been built to modern safety and mobility standards established by Maine DOT and the American Association of State Highway and Transportation Officials (AASHTO). The preservation category includes:
 - Mill & fill which calls for grinding out some of the existing pavement and replacing it with new hot-mix asphalt. This treatment removes inconsistent riding surfaces, restores the cross-section, and/or removes a surface layer of worn, oxidized pavement.
 - Resurfacing this calls for placing a layer of hot-mix asphalt over existing pavement and, in some cases, performing drainage and shoulder work. Types of preservation overlays include:
 - ⇒ ¾ inch overlay the first resurfacing of a rebuilt highway, or the next resurfacing after a more intensive resurfacing project.
 - ⇒ 1¼ inch overlay a resurfacing that involves 1¼-inch depth asphalt. It generally applies when a road requires a more substantial treatment, for structural reasons, than a basic ¾-inch overlay.

Typical design life is 8-10 years

<u>Factors</u>	<u>Score</u>	<u>Weight</u>
Traffic volume	0 to 10	0.30
Truck percentage	0 to 10	0.10
Pavement condition	0 to 10	0.55
Multi-modal and TDM	0 to 10	0.05
Maximums	40	1.0

- 3.) Rehabilitation Work designed to restore the pavement, gravel base, and sub-base to a previous level of service. Rehabilitation projects call for more significant improvements to a road's geometric design and drainage than pavement preservation. In MPO areas, this category covers treatments that add to, replace or improve subordinate elements of a highway, including:
 - Full-depth reclamation which involves pulverizing the existing pavement in place and mixing it with at least 2 inches of aggregate to create a mass that is graded, compacted and overlaid with a new asphalt-wearing course.

- Foamed asphalt a reclamation process that blends hot, new asphalt and water to create foam that coats the aggregate particles, enhancing the structural integrity of the roadway.
- Structural overlay which involves laying down at least 2 inches of hot-mix asphalt to strengthen a
 roadway. A road's structure pavement, gravel base and sub-base receives a rating based on
 conditions and the type of traffic it handles. A structural overlay boosts a road's structural rating so
 that it can withstand wear-and tear from changing conditions, such as higher truck traffic.
- *Sidewalks as part of a Rehabilitation project

Typical design life is 12-15 years.

<u>Factors</u>	<u>Score</u>	<u>Weight</u>
Traffic volume	0 to 10	0.30
Truck percentage	0 to 10	0.15
Pavement condition	0 to 10	0.30
Road geometrics	0 to 10	0.10
Multi-modal and TDM	0 to 10	0.15
Access Management	0 to 10	0.15
Maximums	60	1.15

- 4.) **Operational and Safety Improvements** Investments intended to optimize the safety and capacity of existing facilities. These efforts include:
 - Intersection improvements with and without signals.
 - *Sidewalk construction

There will be three sub categories within the Operational and Safety Improvements Intersection projects for scoring purposes.

- Geometrics and Equipment
- Equipment Only
- Study Recommendations

The scoring for these categories will be as follows:

• Geometrics and Equipment

<u>Factors</u>	<u>Score</u>	<u>Weight</u>
Traffic volume	0 to 10	0.15
Truck percentage	0 to 10	0.05
Road geometrics	0 to 10	0.20
Safety	0 to 10	0.25
Stopped delay/warrants	0 to 10	0.25
Multi-modal and TDM	0 to 10	0.10
Access Management	0 to 10	0.15
Maximums	70	1 15

Equipment Only

<u>Factor</u>	<u>Score</u>	<u>Weight</u>
Traffic Volume	0 to 10	.20
Safety	0 to 10	.35
Stop Delay/Warrants	0 to 10	.35
Multimodal / TDM	0 to 10	.10
Maximums	40	1.0

• Study Recommendations

There will be no scoring criteria for this sub-category. These projects will be recommendations made by the BACTS Policy Committee based on the following standards and prioritized in this order:

- 1) Project must be a "Priority 1" project from the "2009 BACTS Traffic Signal Study" or the latest revision of that study;
- 2) Project shall benefit a corridor (projects with multiple intersection improvements will take higher precedence over those with only one improvement);
- 3) Project is a local or stand-alone project (projects with multiple intersection improvements will take higher precedence over those with only one improvement.); and
- 4) Single improvement intersection (i.e. Pedestrian signal, back plate, dual flasher).

Factor Descriptions

1) Traffic Volume

Traffic volumes for all projects except intersections are based on the latest average annual daily traffic (AADT) counts obtained by BACTS for each project. The score is calculated by dividing the proposed project's AADT by the largest AADT in the set of proposals submitted, then multiplying by ten in order to fit the 0 to 10 scale.

Traffic volumes for intersection proposals are based on the latest peak hour volume collected during a turning movement count by BACTS. The intersection's total approach volume (based on the average of all its approaches) is divided by the largest total approach volume in the set of intersection proposals submitted, then multiplied by ten in order to fit the 0 to 10 scale.

2) Truck Percentage

Truck percentage is to be based on the truck percentage component of the latest average annual daily traffic (AADT) counts obtained by BACTS for each project corridor. The score is calculated by dividing the proposed project's truck percentage by the largest truck percentage in the set of proposals submitted, then multiplying by ten in order to fit the 0 to 10 scale. For intersections, the selected truck percentage will be the highest percentage on any one approach rather than an averaged value.

3) Pavement Condition

Pavement condition is based on the Pavement Condition Rating (PCR) determined for each project corridor during the most recent pavement assessment conducted by BACTS or MaineDOT. The score is calculated by dividing the lowest PCR in the set of proposals submitted, by the proposed project, then multiplying by 10 in order to fit a scale of 0 to 10.

4) Geometrics

Proposals are assigned points in accordance with MAINEDOT's <u>Highway Design Guide</u> for the project's ability to remedy substandard conditions. 2.5 points are awarded for each condition remedied, up to a maximum of 10 points for all four conditions.

Development and rehabilitation project standards are pavement width, shoulder width, horizontal alignment, and vertical alignment.

Intersection project standards are turning radius, lane width, signal or signage placement, and alignment (either horizontal or vertical).

5) Safety

Safety is evaluated based on the percentage of injuries (PI) and the critical rate factor (CRF) for a given intersection, as determined by MAINEDOT based on the most recent cumulative crash data in that location. The formula is as follows:

Total safety points (not to exceed 10 point) = PI points + CRF points
 PI points = 0.125 x percent personal injuries, expressed as a percentage
 CRF = 2.27 x CRF, expressed as a percentage

6) Stopped Delay/Warrants

Signalized intersections are evaluated according to the total delay for vehicles passing through the intersection, using the following formula:

SD = (60-Delay_{after}) x 0.22 (not to exceed 10 points)

Unsignalized intersections are evaluated by the number of MUTCD traffic warrants that are met at that intersection. If one warrant is met, the project scores 3 points; 2 warrants score 7 points; and 3 or more warrants score 10 points.

7) Multi-modal and TDM

A score from zero to ten is given to projects that accommodate alternative modes of travel or better travel demand management (TDM). Points will be awarded as indicated for each criterion that either already exists along a project corridor or will be satisfied through implementation of the proposed project, up to a maximum of 10 points for this factor.

Pedestrian mode:

- New or existing sidewalk meeting ADA guidelines, including curb cuts (1, or 2 within 1 mile of school zone)
- Retrofit new ADA-conforming curb cuts at intersection crosswalks (2)
- New/improved traffic signal w/dedicated or pedestrian-actuated pedestrian phase (1)
- Construction of curb extensions or pedestrian crossing islands, as appropriate (1)
- ½ credit will be given to new/existing ADA sidewalks on less than ½ entire length of project.

Bicycle mode:

- Minimum 3-ft shoulder (preferably 5-ft or more) in ditch sections (1, or 2 within 3 miles of school zone)
- Minimum 4-ft shoulder (preferably 5-ft or more) in curb sections (1, or 2 within 3 miles of school zone)
- Installation of bicycle-friendly drainage grates and/or in-curb drainage (0.5)
- ½ credit will be given to new/existing shoulders meeting above criteria on less than ½ entire length of project.

Transit mode:

- Project is on an existing or planned bus route (2)
- Sidewalk widening to create space for bus shelters (1)
- New/improved ADA-conforming sidewalks and crosswalks between transit stop and stores, businesses, schools, churches, hospitals, public services and facilities, or sub-developments of 10 or more housing units within 1-mile radius (1)
- New/improved traffic signals and crosswalks serving a transit stop (1)

Carpool/Vanpool:

Project will improve access (including signage, lighting, or bus shelters) to a designated park 'n ride lot
 (2)

Mixed-use development:

 Local land use AND access management ordinances are in place to permit and encourage mixed-use development (i.e. retail, residential, commercial, personal services, public space) along project corridor (3)

8) Access Management

10 points will be given to eligible projects when the submitting municipality is willing to sign a three-party agreement that states that access management principles will be given priority consideration during the entire design process

*Note: The following apply when sidewalks are a standalone project or are part of a road project.

- 1.) If a road project that includes sidewalk work is submitted, then use the overall project type. For example, a rehabilitation project that includes work to existing sidewalks, would fall under the project type, "rehabilitation" or if existing sidewalks are being repaired under a reconstruction project it would then fall under the project type, "development");
- 2.) If rebuilding an existing sidewalk as a standalone project, use the "operational and safety improvements" project type; and
- 3.) If building a sidewalk as a standalone project, where no sidewalk exists now, use the "development/new construction" project type.

Errata

Purpose of the Errata: The purpose of the Errata is to provide a mechanism for MaineDOT to communicate changes that have occurred between the time the new STIP project listings are pulled from the system (typically at the beginning of January) and the time it is approved (typically in April or May) by FHWA/FTA. During this time, changes to existing projects warranting disclosure and the addition of new work must be communicated to ensure that proper approvals are in place when the new STIP is approved. It should be noted that most items listed on the Errata reflect Administrative modifications/Amendments to the current STIP that must be in place for a smooth transition to the new STIP when approveds in the previous STIP will not carry over.

Appendix E - Metropolitan Transportation Planning Self- Certification

METROPOLITAN TRANSPORTATION PLANNING SELF-CERTIFICATION

(To be submitted with the Statewide Transportation Improvement Program)

The Metropolitan Planning Organization BACTS (Bangor Area Comprehensive Transportation System), in accordance to Title 23 §450.336 and 23 CFR Part 450 hereby certifies that the transportation improvement process is addressing major issues facing the MPO, and is being carried out in accordance with the following requirements:

- (1) 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
- (2) In nonattainment and maintenance areas, sections 174 and 176(c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506(c) and (d)) and 40 CFR part 93;
- (3) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- (4) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- (5) Section 1101(b) of the FAST Act (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
- (6) 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- (7) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
- (8) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- (9) Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
- (10) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

Appendix F - Public Comments

1) Angela King - Bicycle Coalition of Maine

Recently, I was reviewing the TIP and I have some questions/comments.

First, I am happy to see that there's a non-discrimination policy statement. As part of this statement, it seems that equity in transportation – or at least working towards it – would fit into the non-discrimination policy. A lot of work to be done on transportation equity in Maine. Yesterday I did a long walk in Portland, and the stretches of sidewalks that were not cleared of snow, many areas where plows actually dumped snow, made it difficult to walk on the sidewalks, and to cross roads where the snow was piled at corners so pedestrian signals were not even accessible.

<u>Interesting story</u> on how Sweden came around to prioritizing the clearing of sidewalks and bike lanes based on gender equity.

Second, in the Prioritized Project list, number 1 in Bangor and 2 in Orono are "Rehab" projects. I read that category project definition includes sidewalks. Do either of these two projects include sidewalks? And the last three priority projects, 8,9,10 in Bangor are "Operational and Safety Improvement" projects which also in the OSI definition mention sidewalk construction. Is that part of the project at any of those locations?

And lastly, in Bus Planning and related facilities, does this include the access to public transit by constructing sidewalks, and also having bike parking at bus stops and bike racks on buses?

Thanks for any additional or clarifying information on this. Residents around the state often reach out to BCM, so it's good for us to be aware/ up-to-date on bike/ped improvement work around the state.

BACTS Response - Dianne Rice-Hansen Transportation Project Manager

I wanted to answer your questions you had regarding the priority projects.

The rehab project in Bangor on State Street does include sidewalk improvements. The rehab project in Orono is to replace a failing culvert. This project will not include any sidewalk improvements.

The priority list includes projects that have yet to be funded. When we develop our work plan we start with a very large and extensive list. We do some preliminary scoring and shorten that list hence prioritizing them. Not all the prioritized projects get funded due to funding restrictions. These three projects you mentioned were not funded. They most likely will be resubmitted for consideration in the next work plan process.

When an OSI project is funded the scope of the project will dictate weather there are any ADA upgrades. We do not pave sidewalks as part of those projects but are required to bring the curb ramps, push buttons and ADA signals up to current standards.

For clarification when I said the scope dictates if ADA upgrades are required I meant that if the scope is to replace existing detection or a controller we are not required however if we start changing out signal heads, mast arms and cabinets we would be required.

I hope that answered your questions. If you have any other project related questions please let me know.

2) <u>Laurie Linscott - Bus Superintendent, Community Connector - The 5339a Program Funds from above we would like to program them for related bus equipment NOT ADA Vans.</u>

2021 - 2023 FTA §5339a Program Funding

WIN	Project Description	Federal		State	Local		Total	
022769.21	Transit Capital Assistance for Small Urban Transit - FY 2021	\$	116,820		\$	29,205	\$	146,025
022769.22	Transit Capital Assistance for Small Urban Transit - FY 2022	\$	116,820		\$	29,205	\$	146,025
024739.00	Transit Capital Assistance for Small Urban Transit - FY 2023	S	116,820		Ś	29.205	S	146.025

FY 19	Federal	Local	Total
Related Bus Support Equipment	\$116,820	\$29,205	\$146,025
FY 20	Federal	Local	Total
Related Bus Support Equipment	\$121,585	\$30,396	\$151,981

Response - Connie Reed - BACTS Transportation Planner - This is not from the 2021 TIP. This is from the 2020 TIP. It has been changed in the 2021 TIP.

<u>Laurie Linscott - Bus Superintendent, Community Connector</u> - Can you please ADD CARES Act Funding for capital purchase of 3 ADA vans

FY 21 Federal 100%

Capital Purchase \$149,000 ADA Vans

Response - Connie Reed - BACTS Transportation Planner - Per your POP submitted in August, WIN 025339.00 was created for CARES Act Funding to purchase ADA vans (\$200,000) and bus support equipment (\$98,003) for a total of \$298,003. Are you requesting the amount to be reduced for ADA vans to \$149,000 for a total of \$247,003; or are you no longer wanting to program bus support equipment using CARES Act funding?

<u>Response - Laurie Linscott - Bus Superintendent, Community Connector</u> - No bus support equipment, only using 5339 formula funds from above [for bus support equipment].

<u>Laurie Linscott - Bus Superintendent, Community Connector</u> - I will assume you are updating the new FY 21 5339a funds with the correct apportionment?

Federal Local Total FY 21 5330 a Formula Funds \$112,064 \$28,016 \$140,080

<u>Response - Connie Reed - BACTS Transportation Planner - These funds are allocated by MaineDOT and we will update as requested by MaineDOT. I am not sure these numbers have been published in the Federal Register yet.</u>

<u>Laurie Linscott - Bus Superintendent, Community Connector</u> - Will you ADD the FY 20 5339b Competitive Grant Award

FY 20 Federal Local Total Bus Stops Project \$396,800 \$99,200 \$496,000

Response - Connie Reed - BACTS Transportation Planner - This is included in the TIP as WIN 025351.00

<u>Laurie Linscott - Bus Superintendent, Community Connector</u> - Do you need to remove the 5307 funds programmed to FY21? We will be using CARES Act funds for Operating and there is no need to program them.

<u>Response - Connie Reed - BACTS Transportation Planner - I asked the same question and Lori Brann indicated that she decided to keep them in the TIP as a placeholder for funds in case they were needed.</u>

<u>Laurie Linscott - Bus Superintendent, Community Connector</u> - FY 22 - 5307 funds can stay the same as you have it programmed

2021 FTA §5307 Projects

I	WIN	Project Description	Federal		State		Local		Total
